

SUBSCRIBER INFORMATION PACKAGE

CANADIANDISCOVERY.COM/CDLONE

CDL ONE is Canadian Discovery's premier subscription offering, providing industry-leading intelligence that allows you to learn, evaluate and lead.

CDL ONE consolidates our library of over 3,000 industry articles, maps and technical studies with complex oil and gas data. Subscribers enjoy unlimited corporate access to this wealth of resources through user-friendly web-based platforms, all at their fingertips.

With a CDL ONE Subscription, you gain access to the following resources:

CDL Digest

CDL Play Maps with Catalyst

Technical Studies Library

Online Short Courses

What We Do

Our team continuously analyzes E&P data, literature, industry announcements, operator press releases and more. We then leverage innovative data mining processes, proprietary output algorithms and group brainstorming sessions to identify developing trends, generate leads and ignite ideas.

As a known innovator, CDL specializes in high-graded datasets for Western Canada, including the development of the Well Completions & Frac Database. Our skilled professionals carefully compile, analyze and clean big data for trusted, easy-to-use output and visualizations. Our geological plays are mapped by seasoned experts with target zones confirmed for every well.

Audience

The different components of CDL ONE has helped approximately **200** clients across Canada and the US get up-to-speed quickly and benchmark opportunities. Our primary users include **Geoscience**, **Engineering** and **Land** professionals, as well as those in the **A&D/Finance** industry.

What's Included

With your company subscription to CDL ONE, you get unlimited, company-wide access to the **CDL Digest** and **Technical Studies Library** websites, as well as **CDL Play Maps** with access to data via **Catalyst**. you can download every article, study* and map within our searchable online library. We will notify you every week when new content has been published with our electronic alert services.

You also have access to **CDL's Online Short Courses**. Although this is included with your CDL ONE subscription, CDL's Online Short Courses are delivered through a 3rd party platform and will require separate login credentials. Contact us for access details.

Learn more about each of the CDL ONE resources below.

*Select studies are only available for individual purchase.

CDL DIGEST

The CDL Digest has published over 2,600 articles since 1987. Stay geologically and technically informed with industry-leading exploration and production (E&P) research, technical analysis and reporting with Canadian Discovery's (CDL) premium publication, the CDL Digest. The Digest is designed to enable geoscience, engineering, land and finance professionals across Western Canada to stay abreast of current exploration, development, completions and engineering trends. The Digest will help save time and reduce costs by doing the reconnaissance work for you, allowing you to focus on your core business.

The **CDL Map Series**, exclusive to CDL ONE and Digest subscribers, comprises a collection of regional maps that are focussed on providing subscribers with critical insights on thermal maturity, fluid phase and stress. The maps are delivered in PDF format; shapefiles may be purchased separately. Crown land and activity summaries are also included.

CDL PLAY MAPS

CDL Play Maps deliver a unique view of a resource play by providing a guided tour through observed interrelationships between the distribution of reservoir fluids, variations in thermal maturity and current reservoir conditions, and well production results. The experience is enhanced by the option to download the accompanying maps, shapefiles and datasets, as well as the ability to manipulate and visualize the data online through **Catalyst**, as needed to complement your daily workflow.

TECHNICAL STUDIES LIBRARY

The Technical Studies Library, a product of CDL's expertise division and Rakhit Petroleum Consulting Ltd. (RPCL), comprises Western Canada's largest collection of integrated geoscientific projects. Contained within the Library are over 280 technical studies conducted over the last 35+ years that span the entire Western Canadian Sedimentary Basin, Williston Basin and abroad. Topics include: sedimentology, hydrodynamics, structure geology, petrophysics, and fully integrated subsurface evaluations. Whether utilizing the library to gain a broader regional understanding, or making a quick technical analysis, the Technical Studies Library has the information to get you up to speed in new and old asset evaluations to enhance your technical knowledge, understanding and skills to make informed business decisions.

ONLINE SHORT COURSES

CDL's online short courses provide a flexible way to learn at your own pace, whenever you need it. Our instructors have crafted these courses to easily fit into your busy schedule. Right now, you can access one of three courses that focus on the practical applications of hydrodynamics. We're also preparing to launch two additional courses: one on Deep Basin Systems in the Montney and another introducing carbon storage.

CDL's Online Short Courses are delivered through a 3rd party platform and will **require separate credentials** to login. Contact us for access details, or request enrollment.
